

**Duluth-Superior  
Metropolitan Interstate Council  
HARBOR PLANNING 2019 WORK PROGRAM  
January 1, 2019 – December 31, 2019**

***"Guiding the Future of Transportation for the Twin Ports Area"***

## 2019 Duluth-Superior Harbor Planning Work Program

The following work program identifies projects and initiatives that support the mission of the Harbor Technical Advisory Committee (HTAC). The Arrowhead Regional Development Commission (Minnesota) and Northwest Regional Planning Commission (Wisconsin) are committed to working cooperatively through the Metropolitan Interstate Council (MIC) to complete these tasks. The funding to implement this work will come from the MIC's 2019 Unified Transportation Planning Work Program and Budget, as well as potential funding from HTAC member organizations.

### Work Program Funding

The budget for the 2019 Harbor Planning Work Program is \$39,200. The MIC has committed to this amount in its approval of the 2019 Unified Transportation Planning Work Program and Budget.

In the past, the MIC has asked HTAC member organizations for financial support. Agencies that are members of the Partnering Agreement have been asked to set aside \$5,000; these agencies include the Army Corps of Engineers, Duluth Seaway Port Authority, City of Superior, Minnesota Pollution Control Agency, Minnesota Department of Natural Resources (DNR) and Wisconsin DNR. Other HTAC member organizations have been asked to set aside \$1,000-\$2,000 or the equivalent in-kind time. Large-scale projects such as preparation of the Duluth-Superior Port Land Use Plan and associated implementation strategy, preparation of the Erie Pier Management Plan, and involvement in other past larger events have been funded solely from MIC planning funds.

The MIC continues to support harbor planning by maintaining the budget dedicated to HTAC activities. HTAC member organizations should consider budgeting matters for current and future planning efforts. To assist with these efforts, the HTAC Chair will work with MIC staff to contact HTAC member organizations.

MIC staff has verbal agreements with key stakeholders to assist in implementing the 2016 Duluth-Superior Port Land Use Plan. This assistance will be in the form of in-kind staff assistance.

### HTAC 2019 Work Program

Coordination, Information Exchange and Group Facilitation	<u>\$15,700</u>
Subcommittee Facilitation and Coordination	<u>\$15,700</u>
Program Development / Other Activities	<u>\$7800</u>
<b>2019 Total HTAC Work Program Funding</b>	<b><u>\$39,200</u></b>

## **1. Coordination, Information Exchange and Group Facilitation**

MIC staff will continue to promote the HTAC mission, which is to provide a forum for the discussion of harbor related issues and concerns, promote the harbor's economic and environmental importance to the community, and provide sound planning and management recommendations to the MIC.

### **Provide staffing services to HTAC**

Comprised of representatives from state and federal agencies, local units of government, a variety of maritime interests and businesses, and environmental organizations and staffed by the MIC, the HTAC is an established forum for discussing transportation, environmental, and recreational issues within the harbor. As an advisory committee of the MIC, the HTAC will have the opportunity to forward policy-related motions for the MIC's consideration. The MIC has identified the following tasks for the 2019 work program:

- A. Organize and staff quarterly HTAC meetings to 1) report on progress made on the work plan activities outlined in this document and 2) provide a forum for discussing the status of ongoing harbor-related projects and issues.
- B. Implement the objectives outlined in the Duluth-Superior Harbor Partnering Agreement. That agreement was established in 1996 as a commitment between federal agencies, state agencies, and local units of government to work cooperatively on environmental and navigation issues in Western Lake Superior and along the St. Louis River. Pursuant to this Agreement, the MIC will act as a liaison among federal agencies, state regulatory agencies, local units of governments, private business and environmental interests on issues relating to port land use, dredging, habitat creation, marine safety, port security and maritime infrastructure needs.

---

**Coordination, Information Exchange and Group Facilitation** **\$15,700**

## 2. Subcommittee Facilitation and Coordination

The HTAC has established a subcommittee process in which subsets of the HTAC membership convenes as needed between the quarterly meetings to discuss specific issues or special projects, and bring recommendations or updates to the full HTAC. Currently, the active subcommittees include Dredging, Navigation, and the committee for the Duluth-Superior Port Land Use Plan Implementation Strategy. Subcommittees for Advocacy and Membership & Bylaws exist, but have not been active in a number of years. MIC staff will continue to participate in and assist these subcommittees, as needed and as able.

### Active HTAC Subcommittees

#### **Dredging**

The Dredging Subcommittee will continue to support short and long term strategies for dredged material management. Short term strategies include continuing to develop Erie Pier into a fully developed PRF (processing and reuse facility), develop beneficial reuse habitat creation projects, and re-establish beach nourishment beneficial reuse. Long term strategies include continuing to establish new reuse of dredged materials, both from Erie Pier as well as directly from the navigation dredging cycles. MIC staff will continue to assist this subcommittee by facilitating meetings and by assisting in updating and implementing the 2007 Erie Pier Management Plan.

Other efforts related to dredge material management include working with the Army Corps of Engineers Detroit District regarding updates to the Dredged Material Management Plan for the Duluth-Superior harbor, helping to coordinate stakeholder input of harbor remediation and restoration projects, and working to find additional beneficial reuse projects for the fine-grained, navigation channel dredged materials.

#### **Duluth-Superior Port Land Use Plan**

A study committee was appointed in 2014 to assist with the development of the Duluth-Superior Port Land Use Plan and completed the plan in 2016. This plan helps to guide future land use and development in the port area. In 2017 the subcommittee prepared an implementation strategy for the Duluth-Superior Port Land Use Plan. Members of the Subcommittee provide short updates at each HTAC meeting as steps of implementation of the plan are made. The Subcommittee will meet in the future on an “as needed” basis.

## **Navigation**

The purpose of the Navigation Subcommittee is to bring navigation and port stakeholders together 1 to 2 times a year (or more on an “as-needed” basis) to discuss navigation safety-related topics. As planned, a main meeting is held every spring around the time when shipping and port operations resume in the harbor. Additional meetings may be held to discuss matters related to encountering early and/or extended ice conditions, dredging, development projects, or other matters as deemed necessary. Currently the Subcommittee is working on a boating safety in working harbors project, as well as looking into options to improve navigation lighting for ships entering and exiting the harbor under the Duluth lift bridge.

## **Existing Non-Active HTAC Subcommittees**

### **Membership and Bylaws**

The Membership and Bylaws Subcommittee meets on an “as needed” basis to review membership issues, attendance information and to discuss potential changes to the HTAC bylaws. These meetings may include a series of email contacts to better facilitate the review of materials. MIC staff will assist this subcommittee by bringing relevant materials to the attention of subcommittee members. It is anticipated this Subcommittee will meet during 2019 to update the membership by filling in gaps that have been vacant and to cover for retirements and changes in employment.

### **Open Water Mitigation**

The Open Water Mitigation (OWM) Subcommittee was created in 2015 to examine issues and align existing regulations related to the efficient permitting of development projects within the Duluth Superior Harbor, and to recommend improvements where needed. After two years of work, a dock wall repair and maintenance general permit was developed in 2018. Currently it is not necessary for this Subcommittee to be active.

**Subcommittee Facilitation and Coordination**

**\$15,700**

### 3. Program Development/Other Activities

#### Program Development Activities

In order to allow the HTAC to investigate other harbor issues of concern, MIC staff will assist, as appropriate and as time allows, HTAC stakeholders as they pursue resolutions to issues pertaining to the Duluth-Superior harbor. Some potential ideas and activities are listed below:

- A. Utilizing Erie Pier and new navigation channel dredged materials in state and local beneficial use and reuse projects. Identify barriers to material reuse and work with state and local agencies, as well as private contractors and other potential public and private end users in identifying opportunities to sustainably reuse these materials.
- B. Resolve the issue of what lands Section 10 of the River and Harbors Act of 1899 apply to, including disseminating this information to port stakeholders.
- C. Work with port stakeholders in carrying out strategies identified in the Implementation Framework for Delisting the St. Louis River Area of Concern. Stay abreast of St Louis River and harbor remedial actions and environmental issues.
- D. Assist HTAC partners in establishing more data-based and comprehensive environmental windows for use in waterway permit decisions and conditions. This effort began in 2018, and may become a distinct Subcommittee in the future.
- E. Work with port stakeholders in the efforts to reform the Harbor Maintenance Tax.
- F. Work with port stakeholders to better understand recreational uses in the Duluth-Superior harbor, and to build partnerships with Duluth-Superior harbor recreational user groups and recreation-based businesses, as appropriate.
- G. Assist in preparing a national strategic port resiliency study.
- H. Bring relevant freight issues to HTAC stakeholders as MnDOT and WisDOT develop statewide freight and port planning initiatives.
- I. Assist the Duluth Seaway Port Authority in developing the Garfield C & D Docks.
- J. Promote HTAC as a port planning model for other Great Lakes ports.
- K. Participate with port stakeholders in promoting development of research activities to promote and improve maritime transportation technologies.
- L. Engage federal elected officials to support continuation of GLRI funding.

**Program Development / Other Activities**

**\$7,800**
