

Dan Breneman shared the URL below to the Headwater Partnership's dashboard with several mapping tools for the Harbor, and a link to the priority concern summary.

The Twelve Priority Concerns provide natural resource perspectives for longer-term management of the lower St. Louis River watershed, including a Dredge Material Management outline that occurs on page 15 (or 17 of 58 pages). The objectives listed under Dredge Material Management should introduce a few topics that warrant consideration when developing a workshop.
