#### Non-Discrimination

The Duluth-Superior Metropolitan Interstate Council (MIC) operates its programs and services without regard to race, color, and national origin in accordance with Title VI of the Civil Rights Act. Any person who believes he or she has been aggrieved by any unlawful discriminatory practice under Title VI may file a complaint with the MIC.

For more information on the MIC's Title VI program and the procedures to file a complaint, contact MIC Director Ron Chicka at rchicka@ardc.org, by phone at (218) 529-7506, by mail, or by visiting in person at the MIC office (address above). Complaint instructions and forms can also be found in the Title VI Non-Discrimination Program and Limited-English Proficiency Plan online at dsmic.org/titlevi-policy. If you would like a hard copy of the complaint instructions and/or forms mailed or emailed to you, or if Title VI information is needed in another language or another format, please contact the MIC office.

### RESOLUTION 23-17 OF THE DULUTH-SUPERIOR METROPOLITAN INTERSTATE COUNCIL

Adopting the 2024 – 2027 Transportation Improvement Program for the Duluth, Minnesota Urbanized Area

WHEREAS, the Duluth-Superior Metropolitan Interstate Council (MIC) was created by the Arrowhead Regional Development Commission (ARDC) and the Northwest Regional Planning Commission (NWRPC) as the urban planning policy body and designated Metropolitan Planning Organization (MPO) with responsibility for performing urban transportation planning and is recognized by Minnesota and Wisconsin Governors; and

**WHEREAS**, the Metropolitan Interstate Council has established a comprehensive, cooperative, and continuing (3-C) transportation planning process to develop a unified planning work program, a long-range Metropolitan Transportation Plan, and a Transportation Improvement Program to facilitate federal funding for communities, counties, and transit operators, and to provide technical assistance and expertise to transportation interests; and

**WHEREAS**, US Department of Transportation regulations require the development and annual adoption of a Transportation Improvement Program (TIP) for each urbanized area by the Metropolitan Planning Organization, in cooperation with local elected and appointed highway and transit officials, special interest and service organizations, including users of public transit, the Minnesota Department of Transportation, the U.S. DOT; the Federal Highway (FHWA) and Transit (FTA) Administrations; and

**WHEREAS**, projects utilizing funding under 23 USC and 49 USC Chapter 53 must be included in a Transportation Improvement Program (TIP) adopted by the MIC Policy Board for the Duluth urbanized area; and

**WHEREAS,** the CY 2024-2027 Duluth Urbanized Area TIP is an implementation of *Sustainable Choices 2045,* the long-range Metropolitan Transportation Plan for the Duluth-Superior urbanized area, and is fiscally constrained; and

**WHEREAS**, the Metropolitan Interstate Council has solicited a 30-day public comment period on the Draft CY 2024-2027 Duluth Urbanized Area TIP and any public comments received are recorded and addressed in the final TIP document; and

**WHEREAS**, U.S. Department of Transportation regulations, 23 CFR 450.336(a), provide for selfcertification that the urban transportation planning process is being carried out in conformance with all applicable requirements of:

- (1) 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
- (2) In nonattainment and maintenance areas, sections 174 and 176(c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
- (3) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (4) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color or national origin in employment or business opportunity;
- (5) 49 CFR part 26, regarding the involvement of disadvantaged business enterprises in DOT funded projects;
- (6) 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (7) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR parts 27, 37, and 38;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- (9) Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

**WHEREAS**, in accordance with 23 CFR 450.336(a), the Duluth-Superior Metropolitan Interstate Council hereby certifies that the metropolitan planning process is addressing major issues facing the metropolitan planning area and is being conducted in accordance with all applicable requirements as described above, and that the TIP contains only projects that are consistent with the current long-range Metropolitan Transportation Plan for the urbanized area.

**NOW, THEREFORE, BE IT RESOLVED,** that the Duluth-Superior Metropolitan Interstate Council Policy Board adopts the 2024-2027 Duluth Urbanized Area Transportation Improvement Program.

ATTEST:

Wayne Boucher, Minnesota Co-Chair

Ron Chicka, MIC Director

Nick Baker, Wisconsin Co-Chair

### Map Disclaimer

The information in these maps is a compilation of data derived from various federal, state, county, regional, and municipal sources. Geographic information has limitations due to the scale, resolution, date, and interpretation of the original source materials. Maps and data are to be used for reference purposes only and the Arrowhead Regional Development Commission (ARDC) and the Duluth-Superior Metropolitan Interstate Council (MIC) are not responsible for any inaccuracies herein contained. No responsibility if assumed for damages or other liabilities due to the accuracy, availability, use, or misuse of the information herein provided.

Decisions about transportation investments require collaboration and cooperation between different levels of government and neighboring jurisdictions. As a document, the Transportation Improvement Program (TIP) reports how the various jurisdictions within the Duluth metropolitan planning area have prioritized their use of limited federal highway and transit funding.

The TIP process serves to implement projects identified in the Duluth-Superior Long Range Transportation Plan (LRTP). The Duluth Area TIP document programs project funding for the Minnesota side of the bi-state metropolitan area. Projects planned for the Wisconsin side are programmed in a corresponding Superior Area TIP.

Development of both the LRTP and the Duluth and Superior TIPs are facilitated by the Metropolitan Interstate Council (MIC), the federally designated metropolitan planning organization (MPO) of the Duluth-Superior metro area.

### Duluth-Superior Metropolitan Interstate Council

The MIC was formed in 1975 to coordinate transportation planning for the Duluth, Minnesota-Superior, Wisconsin metropolitan area. It was founded as a joint venture of the Arrowhead Regional Development Commission (ARDC) and the Northwest Regional Planning Commission (NWRPC), which are multi-county planning and development organizations for NE Minnesota and NW Wisconsin, respectively.

As the federally-designated Metropolitan Planning Organization (MPO), the MIC provides a 3C (comprehensive, continuing and cooperative) planning process for all modes of transportation throughout the Duluth-Superior region. It consists of eighteen delegates representing the metro community. Delegates include the representatives of various transportation authorities, local and elected officials, and concerned citizens who are selected by their local units of government. The geographical boundary of the MIC area can be seen in Map 1 on the following page.

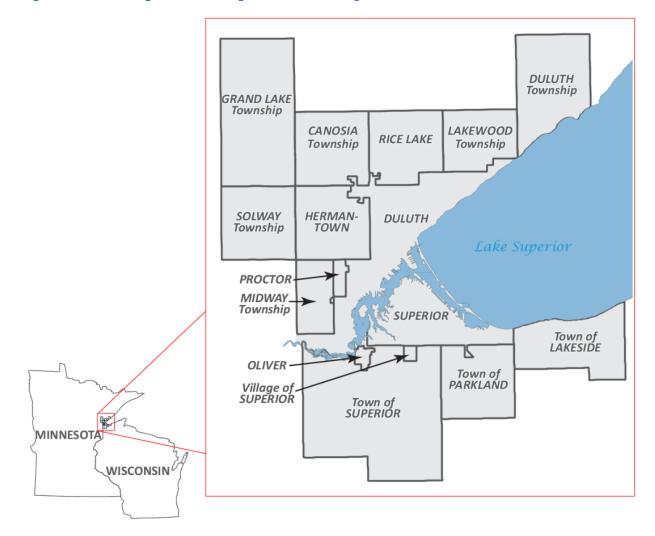

### **Planning Process**

In the transportation planning process, the MIC's role includes:

- Maintaining a certified "3-C" transportation planning process: Continuing, Cooperative, and Comprehensive.
- Coordinating the planning and implementation activities of local, regional, and state transportation agencies.
- Undertaking an effective public participation process, which ensures meaningful public input, is part of the decision-making process behind plans and programs.
- Providing leadership both in setting transportation policy and in metropolitan system planning.
- Lending technical support in planning and operations to local governments.

• Planning for an intermodal transportation system that is economically efficient, environmentally sound, provides the foundation to compete in the global economy, and will move people and goods in an energy-efficient manner.

Map 1: Duluth-Superior Metropolitan Planning Area

*NOTE:* The MIC Urbanized Area, within the Metropolitan Planning Area (shown here), is to be adjusted and finalized by the end of CY 2023

#### **Planning Factors**

The current federal transportation bill, *Infrastructure Investment and Jobs Act* (IIJA), adheres to ten planning factors that must be considered in the transportation planning process, as outlined in the Code of Federal Regulations, 23 CFR 450.306(b). The process used to select projects to be programmed through the Duluth Area TIP is based on the following factors:

1. Support economic vitality of the metropolitan area, especially by enabling global

competitiveness, productivity, and efficiency.

- 2. Increase safety of the transportation system for motorized and non-motorized users.
- 3. Increase security of the transportation system for motorized and non-motorized users.
- 4. Increase accessibility and mobility of people and freight.
- 5. Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and state and local planned growth and economic development patterns.
- 6. Enhance integration and connectivity of the transportation system, across and between modes, people, and freight.
- 7. Promote efficient system management and operation.
- 8. Emphasize preservation of the existing transportation system.
- 9. Improve the resiliency and reliability of the transportation system and reduce or mitigate storm water impacts of surface transportation.
- 10. Enhance travel and tourism.

### Transportation Improvement Program (TIP)

The TIP is a federally mandated, annually prepared document that contains highway, transit, and other transportation projects that are being recommended for federal funding during the next four years in the metropolitan area. The projects included in each year's TIP ultimately come from the area's Long Range Transportation Plan (LRTP) and are aimed at meeting the long-range needs of the transportation system. Implementing agencies, however, propose projects to the MIC on an annual basis to be coordinated into a comprehensive listing of the area's federally funded transportation improvements planned for the short range (as defined as the next 4 years, FY 2024-2027). These listings include information regarding cost, specific funding sources, project so the part of the implementing agency.

TIPs are developed for each metropolitan area by the MPO, in cooperation with the state and the area transit authority (MnDOT and Duluth Transit Authority (DTA), respectively). They must comply with regulations issued by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) but can be revised or amended at any time during the program year by action of the MPO.

The TIP projects programmed for Duluth-Superior metropolitan area must match those included in the Minnesota and Wisconsin Statewide Transportation Improvement Programs (STIPs). The schedules and processes of the two states are different enough to warrant two separate TIPs, as the Wisconsin process comes later in the year. Therefore, the Minnesota and Wisconsin TIPs are compiled separately. The Duluth Area TIP includes projects from the Minnesota side of the Duluth-Superior urban planning area, and the Superior Area TIP including the Wisconsin side. Although the TIPs are prepared separately, participants consider the entire MIC area when considering project prioritization. The MIC and its Transportation Advisory Committee (TAC), which include representatives from Minnesota and Wisconsin, are involved in the development of each TIP, and the MIC Policy Board reviews for approval the TIPs from both states.

### The TIP and its connection to the Long Range Transportation Plan

As stated above, the projects in the TIP originate from *Sustainable Choices* 2045, the Duluth-Superior Long Range Transportation Plan (LRTP). The LRTP contains a list of short-, mid-, and long-range transportation projects that are planned for the metropolitan area over the coming decades. The LRTP, the Bicycle, and Pedestrian Plans, and the short-range studies all provide specific recommendations for projects and future studies. The TIP sets funding for the recommendations from these plans and the MIC's Work Program sets the schedule for when recommended planning studies will move forward. The MIC's Public Involvement Plan sets the public engagement processes the MIC will follow while developing all MIC plans, studies, and programs.

### Federal Funding Sources

Projects included in the Duluth Area TIP will be funded by one of the following funding categories listed below. Funding sources are identified in the following project tables by the acronym in parentheses after each funding name listed below.

Legislation allows MnDOT to reserve the ability to determine which of these funding categories (and how much of each) will ultimately be used to fund any given project in the TIP. As such, the amounts and types of funding shown in the project tables may be subject to modification.

The latest federal transportation bill, the *IIJA* (2021), for the most part, continues the structure of the various funding programs of the previous federal transportation bill, the FAST Act (2015). The IIJA added new formula programs such as the Carbon Reduction Program and the National Electric Vehicle Infrastructure Program, as well as discretionary programs such as the Safe Streets for All (SS4A), and Reconnecting Communities pilot program.

There is also an additional funding source, the Carbon Reduction Program (CRP), which is a program that was a result of the IIJA legislation, described below. These funds are also part of a larger program under the Bipartisan Infrastructure Law (BIL), establishing the Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Formula Program.

### National Highway Performance Program (NHPP):

The National Highway Performance Program combines the former Interstate Maintenance (IM), the National Highway System (NHS), and Highway Bridge (BH) programs of SAFETEA-LU. The NHPP provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in each State's asset management plan for the NHS.

#### National Highway Freight Program (NHFP):

The purpose, among other goals, of the National Highway Freight Program (NHFP) is to improve efficient movement of freight on the National Highway Freight Network (NHFN). NHFN replaces the National Freight Network and Primary Freight Network established under the Moving Ahead for Progress in the 21st Century Act (MAP-21). Section 1116 requires the re-designation of the NHFN every five years, and repeals Section 1116 of MAP-21, which allowed for an increased Federal share for certain freight projects. NHFP funds may be obligated for projects that contribute to the efficient movement of freight on the National Highway Freight Network (NHFN) and are consistent with the planning requirements of sections 134 and 135 of title 23, United States Code.

#### Surface Transportation Block Grant Program (STBG):

Surface Transportation Block Grant (STBG), formerly STP funds provides flexible funding that may be used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway, bridge and tunnel projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects, including intercity bus terminals. States and localities are responsible for a 20% share of project costs funded through this program.

#### Highway Safety Improvement Program (HSIP):

The Highway Safety Improvement Program is aimed at achieving a significant reduction in traffic fatalities and serious injuries on all public roads and is related to addressing conditions identified in a state's Strategic Highway Safety Plan (SHSP). Funds may be used for a variety of safety improvements on any public road, and publicly owned bicycle and pedestrian pathways or trails are also eligible for HSIP dollars. The federal share is 90% (for certain projects it can be 100%), and up to 10% of a state's HSIP funds can be used to help fund other activities including education, enforcement, and emergency medical services.

#### **Transportation Alternatives (TA):**

The Transportation Alternatives (TA) (formerly the Transportation Alternatives Program) is a revision of the former Transportation Enhancements program and now funds projects that were previously funded under the Recreational Trails and Safe Routes to School programs. Eligible projects include, but are not limited to, the creation of facilities for pedestrians and bikes, environmental mitigation or habitat protection as related to highway construction or operations, as well as infrastructure and non-infrastructure related Safe Routes to School activities. States and localities are responsible for 20% of TA funds applied to projects. States may also transfer up to 50% of TA funds to NHPP, STP, HSIP, CMAQ, and/or Metro Planning. Local Area Transportation Partnerships are selecting projects for the solicitation.

#### Federal Transit Administration (FTA):

Transit funding authorized by the FAST Act is managed in several ways. The largest amount is distributed to the states by formula; other program funds are discretionary. FTA transit allocations may be administered by the state or be granted directly to the transit agency. Projects identified as FTA-funded in the Duluth Area TIP generally represent one of several subcategories that represent

different funding programs administered by the FTA to provide either capital or operating assistance to public transit providers.

### Early Let Late Award (ELLE)

MnDOT's ELLE process is a tool used to manage project delivery and fluctuations in funding. This process is used on MnDOT projects only and affects both the federal and state funding targets and the State Road Construction Budget in the year of funding availability. ELLE projects are let in one state fiscal year (July 1 to June 30) and awarded (i.e., funds actually encumbered) in the following fiscal year. The advantage of ELLEs are that it allows the project to be let and awarded in advance of funding availability so that work can begin as soon as the next SFY begins. (Source – MnDOT STIP)

### **Carbon Reduction Program (CRP)**

These are funds that are authorized through the IIJA. The purpose of these funds is to reduce the net carbon footprint of transportation infrastructure, to encourage investment in bike/ped facilities, and/or other carbon-reduction projects, such as LED lighting replacement, etc. These funds are allocated on an annual basis to MPOs; in the case of the Duluth-Superior MIC, these funds are to be allocated within the MPO's Urbanized Area. The allocation of these funds is to be administered by the local MPO for fiscal years 2023, 2024, and 2025. Beyond 2025, these funds will be allocated by the local MPO, with guidance from MnDOT's Carbon Reduction Strategy (CRS). States and localities are responsible for a 20% share of project costs funded through this program.

### DEMO

HPP, Earmark, National Corridor Improvement Program, Projects of National & Regional Significance and all projects that have a Demo ID

### Bridge Replacement Off-System (BROS)

### State Funds (SF)

Funding identified as "SF" indicate that the project is being funded almost exclusively with state funds.

### Bond Funds (BF)

Funding identified as "BF" indicate that the project is being funded almost exclusively with bond funds.

### Local Funds (LF):

Funding identified as "LF" indicates projects that are being funded almost exclusively with local funds but are identified as "regionally significant" and are therefore included in the TIP. The MIC's Regionally Significant Projects definition can be found below.

### **Regionally Significant Project Definition**

MIC area "regionally significant" projects are roadway, transit, and bicycle/pedestrian projects that occur on facilities that serve regional transportation needs (such as access to and from the area outside the region and major activity centers within the region), or that connect to major transportation assets (including transit, seaport, airport, and passenger rail terminals).

A roadway project is generally considered regionally significant if it adds one or more travel lanes for over one mile or involves the addition or reconfiguration of an interchange such that a movement is added or eliminated (e.g., a new turning movement at an intersection) and would normally be included in the modeling of the MIC area's transportation network and in the air quality conformity analysis for the LRTP and TIP and amendments to the LRTP and TIP.

These facilities include all interstates, freeways, principal arterial highways, principal arterials, National Highway System (NHS), NHS intermodal connectors, and all fixed guideway transit facilities that offer an alternative to regional highway travel. (*Approved by the MIC Policy Board* 5/21/14)

## Chapter 2 Project Selection

The existing federal funding and authorization bill for transportation, *Infrastructure Investment and Jobs Act* (IIJA) was signed into law on November 15, 2021. As with the previous federal transportation bill, FAST Act (2015) lead to the development of a Statewide Transportation Improvement Program (STIP). The statewide program is informed by those projects developed at the local level. Therefore, the state and local projects programmed in the STIP must be reflected in the local TIPs.

As the designated MPO for the Duluth-Superior region, the MIC is responsible for planning, reviewing, and programming a list of federally funded and regionally significant surface transportation projects for the Duluth metropolitan area. The MIC is thus required to work in cooperation with MnDOT, DTA, and local governments to identify area transportation priorities and produce the annual TIP. The drafting of this document is done in conjunction with the development of a larger regional program carried out with regional partners of the Northeast Minnesota Area Transportation Partnership (NEMNATP).

### Northeast Minnesota Area Transportation Partnership

The State of Minnesota uses a mechanism called the Area Transportation Partnership (ATP) for distributing federal transportation funds throughout the state. The Duluth Metropolitan Area is served by the NEMNATP, which is made up of transportation professionals and representatives from an eight-county area (Aitkin, Carlton, Cook, Itasca, Koochiching, Lake, Pine, and Saint Louis Counties, see Map 2). Like the MIC, the purpose of the NEMNATP is to prioritize projects in the larger region for receiving federal funding. This priority list is combined with priority lists from other ATPs around the state that ultimately make up the STIP.

In 2018, the ARDC's Arrowhead Region Transportation Advisory Committee (ARTAC) merged with the NEMNATP to create one organization addressing regional transportation topics. Under the new NEMNATP structure, there are representatives from: eight individual counties, tribal communities, transit, modes, US Forest Service, DNR, MnDOT, and the MIC.

Although projects from these eight counties and the MIC are in competition for the limited federal funding resources that come to Northeastern Minnesota, the process used by the NEMNATP aims to provide a degree of equity across this region. Proposed projects are first reviewed by the ATP Work Group, followed by approval of the ATIP by the full NEMNATP. After an ATP review and approval, the Draft ATIP is sent to MnDOT Central Office for compilation of the Draft STIP. The Draft STIP is again reviewed and potentially revised by the ATP. During this review period, the general public has the opportunity to comment on the ATIP. After all reviews are complete, the ATIP is submitted to MnDOT for inclusion in the final STIP.

### Eligibility for Roadway and Transit Projects

Federal funds are eligible to be spent on any road functionally classified as urban roads - minor collector and above; rural roads - major collector and above. The IIJA provides funding for roadway projects through Federal Highway Administration (FHWA) funding programs and transit projects through Federal Transit Administration (FTA) funding programs. FHWA-funded projects can be maintenance-, expansion-, safety-, or operations-related, as well as enhancement-related (bike & pedestrian improvements, scenic byways, etc.). Planning, technology and various other intermodal projects (ports, airports, etc.) are also eligible for FHWA funds.

A portion of Surface Transportation Block Grant (STBG) funding can also be applied to transit improvements, which the NEMNATP has agreed to do in some years to assist regional transit operators in maintaining the average age of their vehicle fleets. In recent years MnDOT Central Office has been awarding FHWA funds towards transit improvements.

### Project Selection Process for the Duluth Area TIP

The TIP project selection process reflects the goals, objectives, and priorities of the Duluth-Superior metropolitan area. As such, MIC staff work with area jurisdictions to ensure that projects that are included in the TIP are consistent with those goals, objectives, and priorities.

The TIP Project Selection process was approved by the MIC Policy Board in October 2020. Only eligible jurisdictions may apply. An eligible jurisdiction is a state agency, county, transit authority, regional rail authority, tribal government, or city with a population over 5,000 that is within the Duluth-Superior Metropolitan Interstate Council (MIC) planning area (see Map 1). Cities and townships with a population under 5,000 people may submit projects but need to be sponsored by an eligible jurisdiction.

### **Pre-Application Meeting**

Each jurisdiction is required to meet with MIC staff prior to selecting a project to move forward with an application for funding. In addition, all jurisdictions and agencies that will be requesting funding that will need to be programmed in the TIP will meet together with the other requesting organizations to ensure the project meets LRTP goals and objectives as well as regional priorities.

### **Project Evaluation and Prioritization**

The MIC evaluates each application for consistency with the regional goals, objectives, and associated project lists in the MIC's Long Range Transportation Plan (LRTP), Sustainable Choices 2045, and how it will contribute to the area's multimodal network as well as the MIC's defined performance measures. The MIC will also gather public input on each of the proposed projects.

NOTE: When the project is complete, the jurisdiction will be asked to submit a status report verifying which modes, LRTP goals and objectives, Performance Measures (PMs), and Transit Asset Management (TAM) targets were achieved in the project.

### **Projects funded through Transportation Alternatives**

Funding eligibility for the Transportation Alternatives program (TA) includes the former Transportation Enhancements eligible projects, Recreational Trails, and Safe Routes to School programs. Construction, planning, and design for these types of projects are all eligible activities under the TA program, as well as projects related to environmental mitigation, or the maintenance and preservation of historic transportation facilities.

Similar to STBG funds, TA funds are allocated to the State DOT and then sub-allocated to the local level. The NEMNATP has developed a biennial application process and TA task force made up of elected officials and transportation professionals that is facilitated by the Arrowhead Regional Development Commission (ARDC). The selected TA projects are subject to the approval of the NE MN ATP, but any selected TA projects that are located within the MIC area are automatically included in the Duluth Area TIP.

## Chapter 3 FY 2024-2027 TIP Projects

The following project tables list all the transportation projects scheduled for federal and/or state funding on the Minnesota side of the Duluth-Superior Urbanized Area. The Wisconsin side can be found in a separate Superior Urbanized Area TIP document. This includes estimated project costs that have been adjusted to represent an annual rate of inflation for roadway projects and for transit related projects. The map following the project tables depicts the location of projects that have a specific geography. The structure of the tables is as follows:

*State Project ID* – Links the project to the Statewide Transportation Improvement Program (STIP).

*Agency* – Local jurisdiction responsible for the project and the route number where the project is occurring.

Roadway Name - Common roadway name

Mile - Estimated length of the project

*Type of Work* – Provides a general description of the improvement being made (drainage improvements, crossing improvements, landscaping, etc.)

Project Description – Scope of project and its location.

*Type of Funds* – Identifies type of funds utilized for the project, LF = Local Funding, SF = State Funding, HSIP = Highway Safety Improvement Program, NHPP = National Highway Performance Program, STBGP = Surface Transportation Block Grant Program.

*Fed* **\$** (*Non-AC*) - Funding from the federal government, that is not an advanced construction project.

*Fed AC* \$ – Federal dollars set for a project, but not paid until the following year.

*Fed AC Payback* – Federal reimbursement of local funds spent to implement a project in advance of receiving federal funds for that project.

*State T.H. or Bond* \$ – State of Minnesota funding for projects.

*Other* **\$** – Funding coming from other sources, including local city, county, transit agency, or WISDOT funds.

*Project Total* \$ (*MnDOT Total*) – Total anticipated cost of the project.

*Project Total* \$ (*MIC Total*) – Total anticipated cost of the project, also including any AC payback funds.

### Chapter 4 Performance Measures and Asset Management

Federal transportation planning regulations require (per the FAST Act) that Performance-Based Planning and Programming are incorporated in the development of Metropolitan Planning Organization (MPO) Long-Range Transportation Plans (LRTPs) and Transportation Improvement Plans (TIPs). This states that "The TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the performance targets (23 CFR 490.101) identified in the metropolitan transportation plan, linking investment priorities to those performance targets." (23 CFR 450.326(d))

The MIC utilizes its planning and programming of projects to contribute to the accomplishments of statewide performance targets and the DTA transit performance measure targets. The approach currently is to adopt and contribute toward the statewide targets for safety, pavement, bridge, reliability, and freight that MnDOT adopts. This approach seemed the most appropriate at this time. The DTA has decided to do its own Transit Asset Management Plan (TAM) and Public Transportation Agency Safety Plan (PTASP). The MIC adopts the targets set by the DTA for the TAM Plan and the PTASP. MIC performance-based planning information can be found at: <a href="http://dsmic.org/study/performance-measures/">http://dsmic.org/study/performance-measures/</a>.

### 23 USC 150: National Performance Measure Goals

- **Safety** To achieve a significant reduction in traffic fatalities and serious injuries on all public roads
- **Infrastructure Condition** To maintain the highway infrastructure asset system in a state of good repair
- **Congestion Reduction** To achieve a significant reduction in congestion on the National Highway System
- **System Reliability** To improve the efficiency of the surface transportation system
- **Freight Movement and Economic Vitality** To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.
- **Environmental Sustainability** To enhance the performance of the transportation system while protecting and enhancing the natural environment
- **Reduced Project Delivery Delays** -To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices <a href="https://www.fhwa.dot.gov/tpm/about/goals.cfm">https://www.fhwa.dot.gov/tpm/about/goals.cfm</a>

### Performance Measures as established in 49 USC 625 and 23 CFR 490

- Transit
  - Rolling Stock: The percentage of revenue vehicles (by type) that exceed the useful life benchmark (ULB).
  - Equipment: The percentage of non-revenue service vehicles (by type) that exceed the ULB.

### **Performance Measures and Asset Management**

- Facilities: The percentage of facilities (by group) that are rated less than 3.0 on the Transit Economic Requirements Model (TERM) Scale.
- Infrastructure: The percentage of track segments (by mode) that have performance restrictions. Track segments are measured to the nearest 0.01 of a mile.

#### • Safety

- Number of fatalities
- Fatalities per 100 million vehicle miles traveled
- Number of serious injuries
- Serious injuries per 100 million vehicle miles traveled
- o Number of non-motorized fatalities and non-motorized serious injuries

#### • Infrastructure

- Percentage of pavements of the Interstate System in Good condition
- Percentage of pavements of the Interstate System in Poor condition
- Percentage of pavements of the non-Interstate NHS in Good condition
- Percentage of pavements of the non-Interstate NHS in Poor condition
- o Percentage of NHS bridges classified as in Good condition
- Percentage of NHS bridges classified as in Poor condition

#### • System Performance on NHS

- Interstate Travel Time Reliability Measure: Percent of person-miles traveled on the Interstate that are reliable
- Non-Interstate Travel Time Reliability Measure: Percent of person-miles traveled on the non-Interstate NHS that are reliable

#### • Freight Movement

o Freight Reliability Measure: Truck Travel Time Reliability (TTTR) Index

#### • CMAQ - Congestion Reduction (NOTE: not applicable to the MIC area)

- Peak Hour Excessive Delay(PHED) Measure: Annual Hours of Peak Hour Excessive Delay (PHED) Per Capita
- Non-Single Occupancy Vehicle Travel (SOV) Measure: Percent of Non-Single Occupancy Vehicle (SOV) Travel
- o Emissions Measure: Total Emission Reductions

### **Performance Measures and Asset Management**

### MIC Adopted (Minnesota) Targets for Performance Measures (PM)

#### PM 1: Safety - Highway Safety Improvement Program Performance, 2023

For the Minnesota portion of the MIC area, the annually adopted Highway Safety Improvement Program (HSIP) Performance Measure Targets for 2021 are as follows: (https://safety.fhwa.dot.gov/hsip/reports/pdf/2020/mn.pdf)

Performance Metric	Baseline (2017-2021 avg)	2023 Target
Number of Fatalities	397	352.4
Fatality Rate (per 100M vehicle miles traveled)	0.695	0.582
Number of Serious Injuries	1664	1463.4
Serious Injury Rate (per 100M vehicle miles traveled)	2.908	2.47
Number of Non-Motorist Fatalities and Serious Injuries	280.8	258.4

#### PM 2: Infrastructure - NHS Pavement and Bridge Condition, 2022-2025 Targets

For the Minnesota portion of the MIC area, the adopted National Highway System (NHS) targets for Pavement and Bridge Condition Performance are as follows:

(https://dsmic.org/study/performance-measures-mn/)

Performance Metric	Baseline	2- Year Target	4-Year Target
Percent of NHS Bridges in Good Condition	31.8%	30%	35%
Percent of NHS Bridges in Poor Condition	5.8%	5%	5%
Percent of Interstate Parvement in Good Condition	70.9%	60%	60%
Percent of Interstate Parvement in Poor Condition	0.6%	2%	2%
Percent of Non-Interstate NHS Pavement in Good Condition	61.4%	55%	55%
Percent of Non-Interstate NHS Pavement in Poor Condition	0.5%	2%	2%

\*Not Required by Code of Federal Regulations

#### PM 3: System Reliability, 2022-2025 Targets

For the Minnesota portion of the MIC area, the adopted National Highway System (NHS) targets for Performance and Freight Movement on the Interstate System Targets are as follows:

Performance Metric	Baseline	2- Year	4-Year
r enormance Metric	Daseinie	Target	Target
Percent of Reliable Person Miles on the Interstate	94.4%	82%	82%
Percent of Reliable Person Miles Reliable on the Non-Interstate	96.1%	90%	90%
Truck travel Time Reliability Indext (TTTR)	1.24	1.4	1.4

\*Not Required by Code of Federal Regulations

#### **Transit Asset Management**

The adopted Transit Asset Management (TAM) Performance Management Targets are as follows:

	Targets for Trar	nsit Asset Management
Asset	Baseline (2019 data)	4-Year Target
Rolling Stock	19.5% of active Fixed	<10% of active Fixed Route vehicles
	Route vehicles have met	and <20% of Paratransit vehicles
	or exceeded useful life.	have reached their useful life.
Equipment	20% of Paratransit	<35% of equipment (i.e. service
	vehicles have met or	vehicles) have reached their useful
	exceeded useful life.	life.
	42% of equipment (i.e.	
	service vehicles) have	
	reached their useful life.	
Parking/Pedestrian Facility	50% of parking/pedestrian	<10% of parking/pedestrian
	facilities have a condition	facilities have a condition rating
	rating below 3 based on	below 3 based on FTA's TERM
	FTA's TERM scale.	scale.
Administrative/Maintenance	0% of facility elements	<20% of facility elements within the
Facility	within the Administrative	Administrative & Maintenance
	& Maintenance Facility	Facility have a condition rating
	have a condition rating	below 3.
	below 3.	

\*Data no longer available

### **Performance Measures and Asset Management**

### Public Transportation Agency Safety Plan (PTASP) Overview

On July 19, 2018, the FTA published the Public Transportation Agency Safety Plan (PTASP) Final Rule, which requires certain operators of public transportation systems that receive federal funds, such as state DOT's and local transit authorities, to establish safety performance measures identified in the National Public Transportation Safety Plan. Here are the Duluth Transit Authority's targets:

Safety Performance Target           Targets below are based on the previous 5 years of Duluth Transit Authority's safety performance data.							
Mode of Transit Service	Fatalities (Total)	Fatalities (per 100,000 VRM)	Injuries (Total)	Injuries (per 100,000 VRM)	Safety Events (Total)	Safety Events (per 100,000 VRM)	System Reliability (VRM/ Failures)
<b>Fixed Route Bus</b>	0	0	3.5	0.18	5	0.26	9,200
ADA/Paratransit	0	0	0	0.19	1	0.38	188,000

### Performance-Based Planning and Programming Processes

Federal performance-based planning requirements direct metropolitan planning organizations to establish performance measures for safety, pavement, bridge, reliability, freight, and transit asset management. The intent of these provisions is to demonstrate how federally-funded investments are helping to meet national, state and local transportation performance targets.

The Long Range Transportation Plan (LRTP) will provide the overall long-term objectives for guidance to help the MPO annually set performance measures and future projects to positively influence these measures. More information on the LRTP can be found at: <a href="http://dsmic.org/planning/long-range/">http://dsmic.org/planning/long-range/</a>.

The MIC's Transportation Improvement Program (TIP) project solicitation and projects within the TIP will work in meeting the adopted performance-based measures. The TIP project selection process has established TIP project scoring criteria that awards points to projects that incorporate the MIC's LRTP and other planning studies. In recent years, the MIC has not scored projects due to smaller federal funding amounts and lack of competition between projects. The MIC revamped the TIP solicitation and scoring process in 2020, to coincide with the newly updated LRTP – Sustainable Choices 2045. MIC performance-based planning information can be found at <a href="http://dsmic.org/study/performance-measures/">http://dsmic.org/study/performance-measures/</a>.

# Anticipated Effect of Transportation Investments on Performance Measures

Federal regulations require that jurisdictions analyze the adopted performance-based measures during development of TIP projects. This review will enable engineers and local planning staff to determine how different aspects of project scoping may positively or negatively impact performance measures locally.

### PM 1 – Highway Safety Improvement Program Performance

The Duluth Area TIP projects are anticipated to overall contribute positively to the statewide safety performance targets. Projects in the TIP include safety improvements for all modes by reducing known conflicts, adding new bicycle and pedestrian infrastructure, improving technology for advanced warnings on the interstate, and more. Additional data and resources, if available, would help the MPO and its partnering jurisdictions better measure performance targets. For more information on statewide reporting, visit:

https://www.fhwa.dot.gov/tpm/reporting/state/safety.cfm?state=Minnesota.

### **Performance Measures and Asset Management**

#### PM 2 – NHS Pavement and Bridge Condition

The Duluth Area TIP projects are anticipated to contribute positively to the overall statewide performance targets for NHS Pavement and Bridge Condition. PM2 targets only apply to MnDOT within the MIC area. While MnDOT District 1 is projecting that by 2024 pavement conditions on the Interstate and Non-Interstate NHS will fall below the statewide target, federal funds are increasingly focused on the NHS system to alleviate this issue.

#### PM 3 - NHS Performance and Freight Movement on the Interstate System

The Duluth Area TIP projects are anticipated to contribute positively to the overall statewide performance targets for NHS Performance and Freight Movement on the Interstate System.

#### **Transit Asset Management (TAM) Targets**

The Duluth Area TIP transit projects are anticipated to contribute positively to the TAM targets. In order to meet targets, the DTA plans to replace regular route buses and paratransit vehicles. They also have "preventative maintenance" budgeted for every year to maintain their current fleet. All four years in the TIP, the DTA has projects that will upgrade technology and facilities, including bus stops/terminals, equipment, and the administrative building/bus garage.

#### Anticipated Effect - Public Transportation Agency Safety Plan (PTASP) Targets

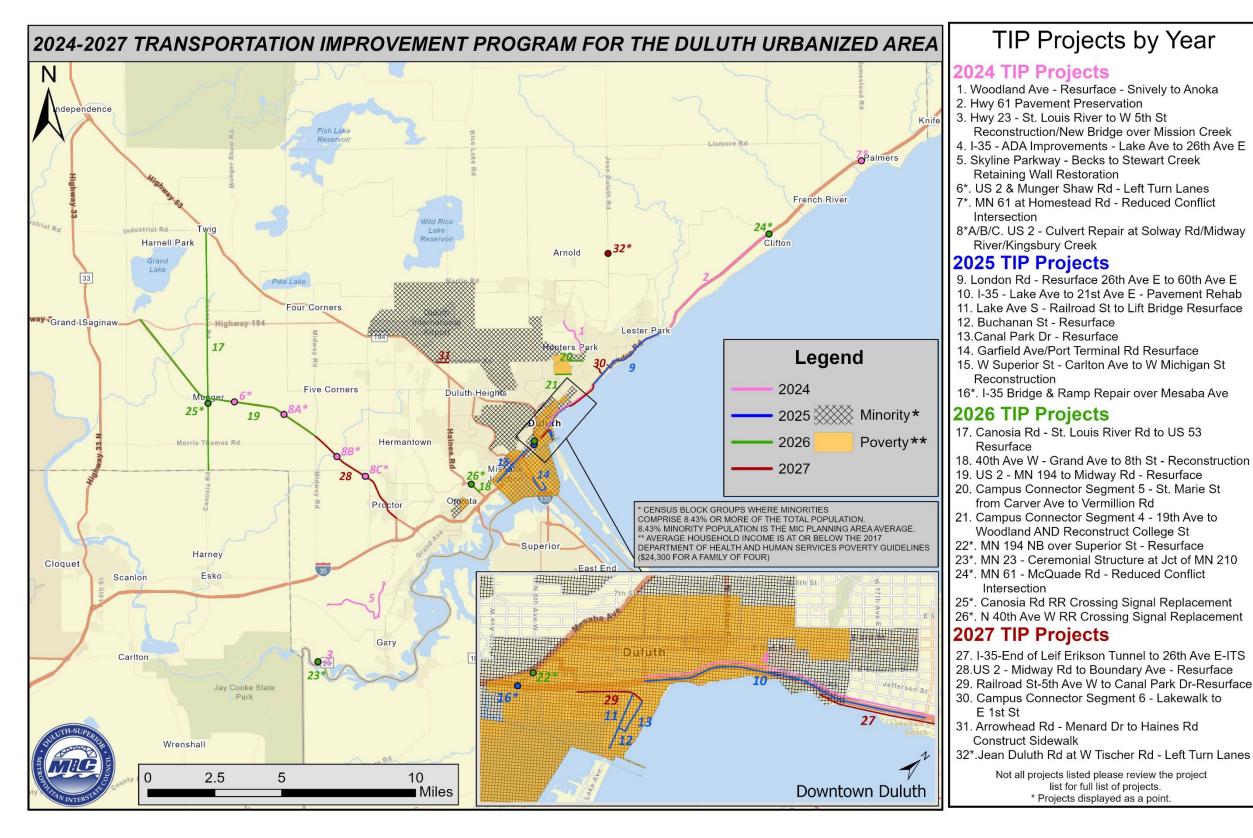

The Duluth Area TIP transit projects are anticipated to contribute positively to the PTASP targets. In order to meet targets, the DTA will be purchasing new buses to replace existing buses and projects are programmed to improving maintenance facilities to keep buses in safe working order. In regards to reliability targets, the DTA is continuing to upgrade technology, including signal programming to reduce delay on the street network and improving fare paying options and the associated technology to reduce time it takes to collect fares when passengers board the buses. In 1994, Presidential Executive Order 12898 mandated that every federal agency incorporate environmental justice in its mission by analyzing and addressing the effects of all programs, policies, and activities on minority and low-income populations. Drawing from the framework established by Title VI of the Civil Rights Act of 1964, as well as the 1969 National Environmental Policy Act (NEPA), the U.S. Department of Transportation (USDOT) set forth the following three principles to ensure non-discrimination in its federally funded activities:

- To avoid, minimize, or mitigate disproportionately high and adverse human health and environmental effects, including social and economic effects, on minority and low-income populations.
- To ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
- To prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority and low-income populations.

Therefore, Environmental Justice/Community Impact Assessment is a public policy goal of ensuring that negative impacts resulting from government activities do not fall disproportionately on minority or low-income populations. While it is difficult to make significant improvements to transportation systems without causing impacts of one form or another, the concern is whether proposed projects negatively affect the health or environments of minority or low-income populations. In the past, the impacts on these groups were often overlooked as potential criteria for project evaluation.

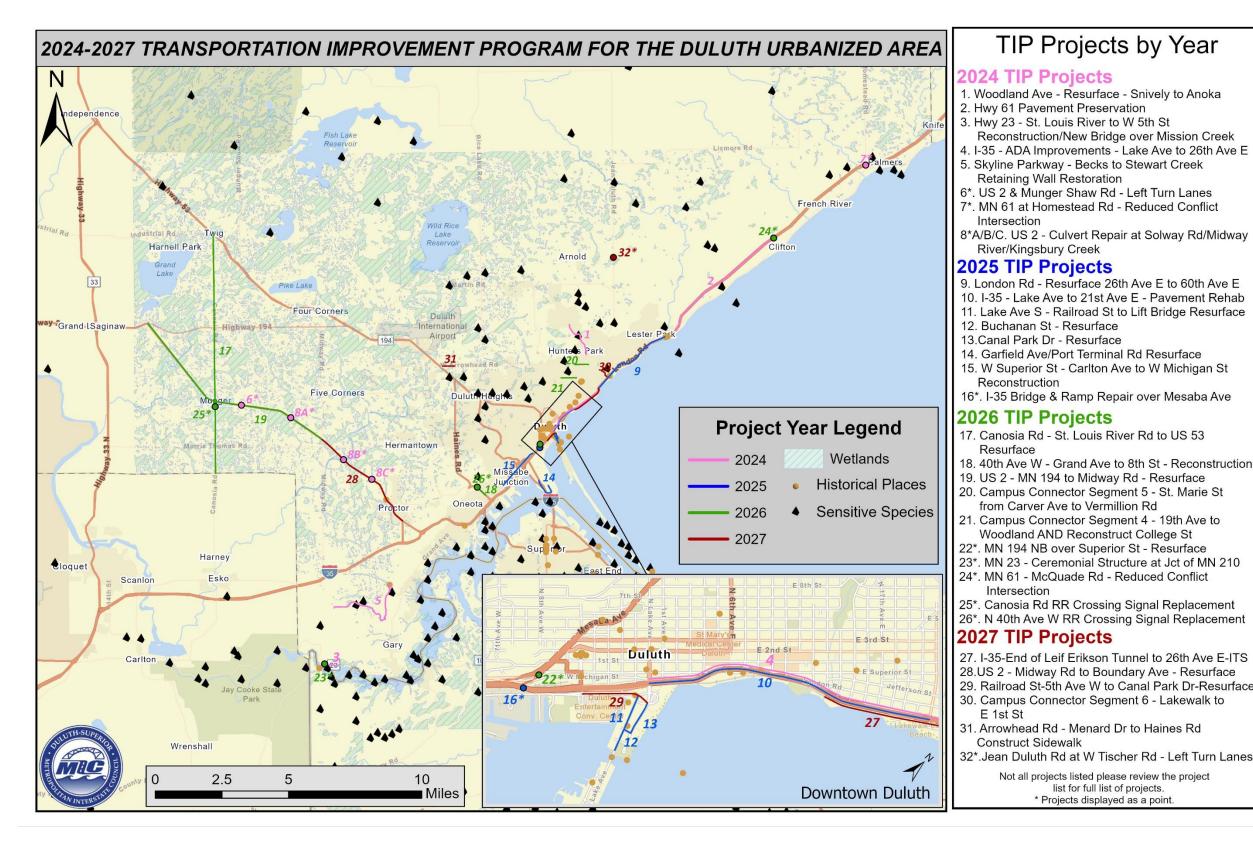

A community impact assessment highlights those transportation projects that could potentially have a negative impact on neighborhoods with larger populations of minority or low income residents. Map 4 identifies the high-concentration areas of minority and low-income populations in the Duluth area and shows their location relative to the projects that are listed in this TIP. While, the vast majority of projects that are at least partially located in these areas, most of which are basic resurfacing, infrastructure rehabilitation projects, safety, or ITS projects that will have no significant alterations beyond the existing road widths and are expected to benefit those areas.

### Map 4: Project Locations and Concentrations of Minority and Poverty Populations

### **Community Impact Assessment**

### Map 5: Project Locations and Historical Places and Sensitive Species

### **Community Impact Assessment**

# Chapter 6 Financial Plan

As the federally designated MPO for the Duluth-Superior metropolitan area, the MIC must demonstrate fiscal constraint when programming funding for projects in the TIP. Under 23 CFR § 450.326(j), the MIC is required to include a financial plan for the projects being programmed in the TIP, as well as demonstrate the ability of its jurisdictions to fund these projects while continuing to also fund the necessary operations and maintenance (O&M) of the existing transportation system. To comply with these requirements, the MIC has examined past trends regarding federal, state, and local revenue sources for transportation projects in the area to determine what levels of revenue can be reasonably expected over the TIP cycle. The resulting revenue estimates were then compared with the cost of the projects in the TIP, which are adjusted for inflation to represent year-of-expenditure.

## Federal Funding Levels

Federally funded transportation projects within the MIC area are programmed regionally through the NE MN ATP process (see page 14 for more information). The NEMNATP receives a targeted amount of federal funding for the northeast Minnesota region which is further directed using a state-established formulae and funding targets. Although subject to flexibility, these targets are used during development of the Duluth Area TIP, the NE Minnesota ATIP, and the MN state STIP to help establish the priority list of projects. Figure 2 below identifies the breakdown of funding targets set by MnDOT to be used in the solicitation process (not all FHWA funds spent).

### Figure 1: Annual Funding Targets – MIC & NEMNATP

### **Trends in Federal Transportation Funding**

Figure 2 below compares the levels of federal funding being programmed in the Duluth Area TIP and the NEMNATIP with the TIP and ATIPs of the last 5 years for all FHWA funding.

### Financial Plan: Roadway Investments

Figure 3 represents the Duluth Area's financial plan for funding the roadway projects being programmed in the Duluth Area TIP. It identifies individual funding sources as specified by each of the jurisdictions to be expected and available during the next four years.

### **Assessment of Fiscal Constraint**

The MIC has assessed the ability of the area's transportation authorities to meet their financial commitments with regards to the projects being programmed in the TIP while also continuing to fund their ongoing operations and maintenance (O&M). To demonstrate fiscal constraint, project costs were compared with budget data from previous years. Project costs have been adjusted to reflect an inflation rate to account for the effects of inflation at the year of expenditure. Revenue estimates were held flat over this same period, as budget increases cannot be reasonably assumed at this time.

Figure 4 provides expected annual average revenue levels for the Duluth Area jurisdictions based on the expenditures of recent years. The O&M column represents all roadway expenditures short of any major rehabilitation (including seal coating, street lighting, snow removal, etc.), while Capital Outlay represents expenditures related to the rehabilitation or construction of roads.

These averages are compared against the TIP project costs in Figure 6 to show that project costs in the TIP do not exceed the revenue levels expected for capital outlay, and that jurisdictions will also continue to have the financial capability to carry out general system maintenance beyond the funds directed to those TIP projects. MnDOT's projects do however show a much higher expense in the next four years than historical revenues due to the very large Twin Ports Interchange Reconstruction Project. In this case, MnDOT will be receiving additional funding for construction from statewide sources (Bridge program and state bonding and federal funding from FAST Act's National Highway Performance Program (NHPP) and National Highway Freight for the Twin Ports Interchange (TPI) Reconstruction Project. Maintenance and operations costs for the Twin Ports Interchange costs are not expected to increase with the reconstructed TPI.

Jurisdiction	20	24	20	25	20	26	202	27	Annual Avg		
	Maintenance	Operations

### Financial Plan: Transit Investments

Figure 5 represents the Duluth area's financial plan for funding the transit projects listed in the Duluth Area TIP. The table identifies specific sources of funding that the DTA has determined to be reasonably expected and available during the next four years.

Source	2024	2025	2026	2027	4 Yr Total
FTA	2,022,994	10,702,681	3,522,621	4,111,538	20,359,834
FHWA	692,000	0	244,000	256,000	1,192,000
Fed Total	2,714,994	10,702,681	3,766,621	4,367,538	21,551,834

Total	23,790,169	34,856,810	27,320,796	29,250,404	115,218,179

### Figure 5: Transit Funding Plan: Duluth Area TIP

### **Assessment of Fiscal Constraint**

The MIC has assessed the ability of the DTA to meet their financial commitments with regards to the transit investments being programmed in the TIP while also continuing to fund their ongoing O&M. The costs of these investments have been adjusted to reflect an inflation rate of 2.1% per year.

In general, revenue estimates were not adjusted for inflation, as significant budget increases cannot be reasonably assumed at this time. With that said, however, the DTA has the legal authority to collect up to \$2.3 million/year more in local tax levy than the average \$1.4 million they are currently collecting. This gives the DTA some buffer against annual fluctuations in fuel and maintenance costs.

Figure 6 shows the DTA's average annual funding levels based on historical expenditures. The DTA's programmed investments for years 2024-2027 are expected to be higher than historic spending due to commitments from MnDOT. The increase is mainly in the operations and maintenance category.

							EXPENSES	REVENUES
Source	2024		2025	2026	2027		4 Yr Total	Avg. Expend. (4 years)
Operations & Maintenance	\$ 22,675,169	\$	23,808,928	\$ 24,999,375	\$ 26,249,34	43	\$ 97,732,815	\$24,433,204
Capital Outlay	\$250,000	Υ,	\$11,047,882	\$2,016,421	\$2,513,46	61	\$15,827,764	\$3,956,941
Bus Purchases	\$865,000		\$0	\$305,000	\$487,60	00	\$1,657,600	\$414,400
TOTAL	\$23,790,169	\$	34,856,810	\$ 27,320,796	\$29,250,40	4	\$115,218,179	\$28,804,545

### Figure 6: Total Transit Costs by Project Type: Duluth Area TIP (millions of dollars)

The MIC is committed to being a responsive and participatory agency for regional decisionmaking. Every year, the public is given a continuous opportunity to view all TIP related materials on the MIC website (dsmic.org) and provide comment via phone and/or email. Prior to project solicitation, the MIC encourages eligible jurisdictions to submit projects that have had or will have some level of public input. This information then becomes part of the criteria used to prioritize TIP project submittals.

The MIC annually reaffirms its dedication to transparency and outreach in the TIP process and evaluates its public involvement efforts every year. From year to year, some of the outreach activities chosen may be more proactive or more targeted than in other years, based on the projects that are being programmed. However, the core objectives remain the same: transparency, public awareness, and open access to the planning process for all those who are interested.

## **Duluth Area TIP Public Participation Summary**

The MIC began the TIP process with the development of a public engagement strategy that identified the actions listed below, showing the actions that were taken and explains the reasons for any deviations from the original strategy.

TIP Public Engagement Strategy: Identified Strategy Actions and Dates	Implementation Status
November 2022	
1. Commencement of TIP cycle	1.a <b>Completed</b> as planned.
<ul> <li>a) Conduct initial communications and update TIP engagement strategy.</li> </ul>	
December 2022 - March 2022	1.b <b>Completed</b> as planned.
2. Project solicitation	
<ul> <li>a) Announce start of project selection process at December TAC, MIC and DTA meetings; explain application materials/process (introduce project timeline).</li> </ul>	2.a <b>Completed</b> as planned.
<ul> <li>b) Publish jurisdictions' project applications up on the MIC website.</li> </ul>	
c) Send notice to MIC mailing list contacts.	2.b Completed as planned.
<ul> <li>d) Posted informational display in Downtown Skywalk that includes photos and map of project locations.</li> </ul>	2.c, 2.d <b>Completed.</b> Due to COVID 19 Pandemic, all information posted only virtually on the MIC website.

### Figure 7: Public Engagement Strategy and Implementation

# **Public Involvement**

### (Figure 7 Continued)

### 3. Project Selection Process

 a) Emphasize "public involvement" category as part of project scoring criteria and report public comments to date prior to TAC and MIC boards prior to project scoring activity at March TAC and MIC meetings.

April 2023 - June 2023

### 4. Drafting/Releasing the TIP

- a) Document includes maps of project locations and community impacts
- b) Distribute draft TIP document to TAC and MIC members prior to September meetings (where draft will be presented for approval).
- c) Post Draft TIP on MIC website.
- d) Publish legal notice in Duluth News Tribune, commencing 30-day Public Review period.
- e) Publish article to notify and solicit comment on the draft TIP document.
- f) Hold a MIC office open house to invite people to come and discuss the projects in the draft TIP.
- g) Consult with state and federal agencies.
- h) Report public comments at June TAC and MIC meetings prior to approval.
- i) Present Final TIP to MIC Policy Board for approval.

3.a *Reported* to TAC and MIC members all public comments received during the initial public comment period.

#### 4.a Completed.

4.b *Completed.* The Draft TIP was sent to TAC and MIC members for review in June.

4.c and 4.d Following TAC and MIC approval, the draft was posted on the MIC's website. A legal notice of the official review period will be published in the Duluth News Tribune.

4.e and f A MIC will author an article and send it out to local news sites discussing the TIP and advertising a series of virtual public information sessions will be held in July.

4.g Draft document will be e-mailed to contacts at MnDOT, FHWA and FTA for their review and consultation.

4.h Staff reported on public comments received during development of the TIP.

4.j Final TIP is planned to be presented for approval at the MIC Policy Board at the August 17, 2022 meeting.

### Public Comments Received

In July 2023, the MIC conducted three 1-hour virtual public input sessions on Thursday, July 20<sup>th</sup>, with a presentation by MIC staff and listening session for project input. The one significant comment heard was regarding the proposed roundabout on 26<sup>th</sup> Ave E on London Rd. The comment was that the proposed roundabout will not work optimally for bicyclists, and that an "unbalanced" roundabout with a slip-lane, as proposed, will be less safe, according to MnDOT research (see: "A Study of Traffic Safety at Roundabouts in Minnesota, MnDOT, 2017, rev. 2021)

For jurisdictional input, the MIC reached out specifically to partner organizations to garner specific feedback on our project lists and financial details. The input from these three efforts are currently reflected in this document.

The MIC has the responsibility of monitoring and documenting the progress of projects listed in the TIP each year. Specifically, the MIC is asked to note changes in priorities from prior years, as well as list the major projects from the previous TIP that have been either implemented or significantly delayed.

The MIC conducts this monitoring process throughout the year through regular contact with jurisdictions, by being an active participant in the ATP Work Group, and by regularly attending the ATP meetings. In addition, MIC staff receive updates on projects at their annual fall "pre-application" meetings with the jurisdictions to discuss the upcoming TIP project solicitation cycle. Each jurisdiction is also asked to update the status of their projects in the summer in conjunction with putting together the Draft TIP.

The priorities for the region have not changed much over the years. Preservation of the existing transportation system remains the top priority. This is reflected in the fact that the bulk of the projects listed in the TIP involve the reconstruction or rehabilitation of existing infrastructure. Under the preservation category, a focus has been placed on improving/restoring MnDOT's trunk highway system, as well as the county and local systems.

The status of the projects programmed in the previous years' TIP, have been updated with this TIP. Projects programmed for FY 2023, however, are presently being constructed and are dropping out of this updated TIP. Table 6 on the following page provides a status report on those projects.

# Table 6: FY 2023 Projects Status Report

Agency	Project Description
MnDOT	MN 23 IN DULUTH JCT CSAH 3 BECKS RD. US STEEL CREEK CULVERT REPAIR. (TIED 6910-103)
MnDOT	MN 23 IN DULUTH SPRING ST. GOGEBIC CREEK CULVERT REPAIR. (TIED 6910-102)

# NOTICE OF 30-DAY PUBLIC COMMENT PERIOD Draft 2024-2027 Transportation Improvement Program for the Du-luth Metropolitan Area

The Duluth-Superior Metropolitan In-The Duluth-Superior Metropolitan In-terstate Council (MIC), located at the Arrowhead Regional Development Commission, 221 West First Street in Duluth, MN, has prepared a draft 2024-2027 Transportation Improve-ment Program (TIP) for the Duluth Metropolitan Area. The draft TIP lists all transportation projects in the all transportation projects in the greater metropolitan area that are proposed to receive federal trans-portation funds for the four-year pe-riod 2024-2027.

To view the draft TIP online, visit www.dsmic.org/duluth2027

Public comments are being taken from July 1 through July 30, 2023 on the draft TIP and its proposed projects. Contact Prescott Morrill, by email at pmorrill@ardc.org or by phone at (218) 529-7573 with comments, questions or to request a printed copy of the document. Free TTY services are available through

Minnesota Relay at 800-627-3529. Three virtual public input sessions Will be held on Thursday, July 20, 2021 from 9am-10am and 4:30pm 5:30pm and on Friday, July 21 from Noon-1pm, to review the pro-posed projects, answer questions and take comments. These meet-ings will be held online and by telephone. Login and call-in information for the three meetings can be viewed on the TIP web page at https://dsmic.org/transportation - im p rovement -program/duluth2027. Public access and public comment opportunities will be provided as permitted by Minn. Stat. § 13D.021 for local government meetings, allowing the use of com-munications media technology such as telephone and video conferencing. The draft TIP, along with all com-ments received, will be considered for final approval at the MIC Board meeting on August 16, 2023. Approval of the 2024-2027 TIP by the MIC Board authorizes the use of federal funds for all regionally significant transportation projects within the greater Duluth area for those four years. Public comment is solicited for a 30-

day period in accordance with the MIC's Public Involvement Plan for this Draft document. The MIC's public participation process satisfies the Duluth Transit Authority's public participation requirements for the program of projects. (July 1 & 5, 2023) 238826

MN Affidavit No. 238826

#### **AFFIDAVIT OF PUBLICATION**

#### STATE OF MINNESOTA

#### COUNTY OF ST LOUIS

Taylor Herhold, being first duly sworn, on oath states as follows:

1. I am the publisher of the DULUTH NEWS TRIBUNE, or the publisher's designated agent. I have personal knowledge of the facts stated in this Affidavit, which is made pursuant to Minnesota Statutes §331A.07.

2. The newspaper has complied with all of the requirements to constitute a qualified newspaper under Minnesota law, including those requirements found in Minnesota Statutes §331A.02.

3. The dates of the month and the year and day of the week upon which the public notice attached/copied below was published in the newspaper are as follows: Saturday, July 1, 2023, Wednesday, July 5, 2023.

4. The publisher's lowest classified rate paid by commercial users for comparable space, as determined pursuant to § 331A.06, is as follows: \$45.00 per column inch.

5. Pursuant to Minnesota Statutes §580.033 relating to the publication of mortgage foreclosure notices: The newspaper's known office of issue is located in ST LOUIS County. The newspaper complies with the conditions described in §580.033, subd. 1, clause (1) or (2). If the newspaper's known office of issue is located in a county adjoining the county where the mortgaged premises or some part of the mortgaged premises described in the notice are located, a substantial portion of the newspaper's circulation is in the latter county.

Dated this 5th day of July, 2023. Notary Public
