Goals & Schedule

The State Freight Plan will:

Gather perspectives from a wide variety of people with an intentional focus on communities who have historically been excluded from decision-making in freight planning.

Be informed by past freight planning efforts, including the MnDOT District Freight Plans and the Manufacturer's Perspectives Studies.

Connect to and inform the Minnesota Statewide Multimodal Transportation Plan.

Dictate investments in the freight transportation system—highways, railroads, waterway ports and airports—to create a 20-year vision for the freight network.
